

Bicycle Watchdog

Hounding authorities to make your ride safer!

- 🚲 Tired of dodging the same potholes and road debris everyday?
- 🚲 Fed up with dangerous, unusable "bike lanes"?
- 🚲 Frustrated by signal sensors that don't detect bicycles?
- 🚲 Confounded by poor road design that creates conflicts?

Don't just suffer silently, *tell the authorities!*

Bicycle Watchdog is here to help you identify and publicize deficiencies in our transportation infrastructure that hinder bicyclists. By publicizing hazards on this website and sending the details of those hazards to the appropriate jurisdiction, we help to facilitate communication between bicyclists and those responsible for design, construction, and maintenance of our streets—and (most of all!) to ***get these problems FIXED!***
